PUBLIC NOTICE

Regarding Modifications to the Georgetown and Pier 91 Facility RCRA Part B Permits

January 11, 1995

Burlington Environmental has modified the existing RCRA Part B Operating Permits for its Georgetown and Pier 91 dangerous waste management facilities. In accordance with Washington State Dangerous Waste Regulations WAC 173-303-830, the changes are Class 1 modifications. Of the three classes of modifications, Class 1 modifications are the most minor and do not substantially affect facility operations.

General Facility Operations

The Georgetown Facility (WAD000812909) is located at 734 S. Lucile, Seattle, WA 98108, and provides for the storage and treatment of dangerous wastes in containers and tanks. Treatment processes include distillation, solidification, stabilization, cyanide destruction, and blending of waste fuels. The facility also collects household hazardous wastes for proper management. There is no disposal of dangerous wastes on site.

The Pier 91 Facility (WAD000812917) is located at 2001 W. Garfield, Seattle, WA 98119, provides waste oil recovery services and tank storage/treatment of bulk dangerous wastes. There is no disposal of dangerous wastes on site.

Summary of the Class 1 Modifications

Pier 91 Facility

Modification PRMOD5-1: Revisions to waste analysis plan to clarify inter-facility transfers.

Modification PRMOD6-1: Closure Plan cost updates

Modification PRMOD7-1: Contingency Plan updates

Georgetown Facility

Modification GTMOD26-1: Addition of particle sizing equipment to the existing emulsification system. This was a Class 1 requiring prior Ecology approval. Ecology approval was granted on October 26, 1994.

Modification GTMOD27-1: Revisions to waste analysis plan to clarify inter-facility transfers.

Modification GTMOD28-1: Closure Plan cost updates
